Coding Standards:
1. The documentation above each file, giving a general summary of what this file does.
2. Functions should accomplish one goal and should be short.
3. Naming files, functions, variables appropriately to what it is doing within the program.
4. Proper spacing, indentations.
5. Doxygen Syntax for commenting.
6. Comments will be required for functions, constructors, and classes.
7. Pushing / pulling to and from Github will be necessary upon each story completion.
